

Jamil Omer

Smyrna, Tennessee | 615-710-5168 | JamilMayi04@gmail.com | <https://www.linkedin.com/in/jamilomerr>

SKILLS

Programming Languages: C++, Java, Python, JavaScript, TypeScript, Ruby, SQL, HTML5, CSS3

Software Engineering: Object Oriented Programming (OOP), Data Structures & Algorithms, Algorithm Design & Analysis, Software Development Life Cycle (SDLC), Agile / Scrum Methodologies, Backend Development, API Integration, Version Control (Git & GitHub)

Cloud & Infrastructure: Exposure to Cloud Platforms (AWS, Google Cloud, Microsoft Azure), Containerization Concepts (Docker), Basic Linux & Shell Scripting (Bash)

Web & Application Development: Ruby on Rails, Angular, Exposure to Frontend & Full-Stack Development, Web Application Architecture

Tools & Platforms: GitHub, Visual Studio Code, Office 365, Docker, Bash / Shell Scripting, Ignition (Inductive Automation)

Operating Systems & Environments: Windows, Linux / Unix, macOS

EDUCATION

Bachelor of Science in Computer Science | Tennessee Technological University | Cookeville, TN | 2024

Relevant Coursework: Software Engineering I & II, Data Structures & Algorithms, Object-Oriented Programming & Design, Database Management Systems, Operating Systems, Web Programming, Computer Architecture, Computer Networks, Design of Algorithms, Cryptography & Network Security, Unix / Linux Systems

WORK EXPERIENCE

Programmer Analyst I | September 2024 – Present
Wearwell LLC | Smyrna, TN

Wearwell is a manufacturer of industrial flooring and matting products focused on improving workplace safety and operational efficiency.

- Design, Develop, and maintain data visualization and analytics solutions to support operational, production, and performance reporting across multiple departments.
- Build and Enhance Tableau dashboards to visualize real-time and historical metrics, enabling faster, data-driven business decisions.
- Extract, transform, and validate data from SQL databases and Epicor ERP systems, ensuring data accuracy, consistency, and reliability.
- Collaborate with stakeholders to gather requirements and translate business needs into technical reporting and analytics.
- Support and maintain ERP system workflows, gaining exposure to enterprise application architecture and system integrations.
- Assist with IT support tickets, troubleshooting software, data, and network-related issues in a production environment.

Software Engineer Intern | October 2023 – May 2024
CodeTank Labs | Knoxville, TN

A small, experienced development team with over 30 years of combined experience creating web, mobile, and immersive applications for clients ranging from startups to established brands across industries.

- Contributed to the design and development of production-level software features in a client-facing SaaS environment.
- Developed and enhanced a payment processing system, implementing additional payment methods, invoice management and performance improvements.
- Integrated Stripe API's for secure payment handling and transaction processing.
- Designed and implemented a sales representative interface using Ruby on Rails, SQL, and Angular, improving usability and sales workflow efficiency.
- Optimized database interactions and queries to improve application performance and reliability.
- Collaborated with engineers, project managers, and stakeholders in an Agile / Kanban workflow to deliver features on schedule.
- Supported project coordination and client communication using Microsoft Teams, contributing to on-time delivery of milestones.

- Participated in code reviews, testing, and iterative development cycles.

PROJECTS

Portfolio Website | Personal | memillyow.github.io | October 2025 – Present

- Designed and developed a personal portfolio website to showcase software engineering projects, technical skills, and professional experience.
- Implemented a responsive, user-focused interface emphasizing clean design, accessibility, and maintainable structure.
- Built using modern web development practices and version control workflows to support ongoing iteration and feature expansion.
- Organized project content and site structure to clearly communicate technical experience to recruiters and hiring managers.
- Deployed and hosted the site using GitHub Pages, enabling continuous updates and public accessibility.
- Maintained the project as a living codebase, incorporating feedback and incremental improvements over time.

LEADERSHIP & ACTIVITIES

ESports Club | Social Media Manager / Valorant Varsity Coach and In-Game Leader (IGL) | June 2020 – May 2024

- Served as varsity coach and in-game leader, responsible for strategy development, real-time decision-making, and team coordination in competitive games.
- Led structured practice sessions, analyzed performance, and implemented iterative improvements to team strategy and execution.
- Managed event promotion and digital communications across multiple social media platforms, coordinating announcements, schedules and content delivery.
- Promoted large-scale events, including a collegiate rivalry match against the UTK Esports Team, generating thousands of views and significantly increasing organizational visibility.
- Demonstrated leadership, communication, and accountability while balancing academic and technical commitments.
