EDUCATION

Tennessee Technological University

Bachelor of Science in Computer Science

Cookeville, TN

Aug. 2019 – May 2024

EXPERIENCE

Programmer Analyst I

Wearwell

Sep. 2024 – March 2026

Smyrna, TN

- Designed, developed, and maintained data visualization and reporting solutions to support operational, production, and performance analysis across multiple departments
- Engineered and enhanced Tableau dashboards for real-time and historical data reporting, improving access to key business and production metrics
- Wrote SQL queries and performed data extraction, transformation, and validation from relational databases and Epicor ERP systems to ensure data accuracy and reliability
- Collaborated with cross-functional stakeholders to gather requirements and translate business needs into technical reporting and analytics solutions
- Supported ERP-related workflows and gained hands-on experience with enterprise system architecture, data integration, and business process optimization
- Troubleshoot software and data related issues through IT support tickets in a production environment, helping maintain system functionality and user productivity

Software Engineer Intern

CodeTank Labs

Oct. 2023 – May 2024

Knoxville, TN

- Contributed to the design and development of production-level software features in a client-facing SaaS environment
- Developed and enhanced a payment processing system by implementing additional payment methods, invoice management functionality, and performance improvements
- Integrated Stripe APIs to support secure payment handling and transaction processing
- Designed and implemented a sales representative interface using Ruby on Rails, SQL, and Angular to improve usability and workflow efficiency
- Optimized database queries and application data interactions to improve system performance and reliability
- Collaborated with engineers, project managers, and stakeholders in an Agile/Kanban environment to deliver features on schedule
- Participated in code reviews, testing, and iterative development cycles to support software quality and maintainability

PROJECTS

Website Portfolio | *HTML, CSS, JavaScript, Git/GitHub/Github Pages*

April 2025 – Present

- Designed and developed a personal portfolio website to present projects, technical skills, and professional experience in a structured, user-friendly format
- Created a responsive front-end using HTML, CSS, JavaScript, and Tailwind CSS, incorporating custom styling and retro-themed interface elements
- Improved usability across desktop and mobile devices by implementing responsive layouts, scalable content sections, and consistent navigation design
- Managed deployment and version control with Git, GitHub, and GitHub Pages to support ongoing development and site updates

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R

Developer Tools: Git, Docker, Exposure to Cloud Platforms (AWS, Google Cloud, Microsoft Azure), VS Code, IntelliJ, Ignition (Inductive Automation)

Software Engineering: Object Oriented Programming (OOP), Data Structures & Algorithms, SDLC, Backend Development, API Integration, Version Control (Git & GitHub)
